

July 10th 2008

To whom this may concern,

I first contacted Mr. Larry Berlin (Berlin & Associates) on April 9th 2008. I needed some material done for a show in Europe quickly. I first started off by requesting a multi-panel display. Berlin & Associates was the only company I attained who was willing to custom make this panel. Mr. Berlin personally came to our office to show & explain a sample of a display his team had built, to make sure we were both on the same page. We were grateful for the recommendations he gave us, which modified our original idea to something a lot more versatile. He visited our office several times to show us the advancement of the project and remained very flexible with our demands. In addition, we were planning on having pop-up banner displays and large graphic frames done by a company we had previously worked with. After considering Mr. Berlin's engagement in our project, we decided to cancel with the other company and have everything made by Berlin & Associates including all the art work involved in the projects. Furthermore, we had requested that the delivery date be advanced by 2 days. In spite of the aggressive timeline, Mr. Berlin delivered the projects on time and surpassed our expectations. Everything was supplied in solid cases, which worked out great considering we were shipping to Europe. We were very happy with the final results and will definitely continue working with this company.

If you need further explanations, do not hesitate to contact me.
