Our purpose: create, design and build exhibits that meet your needs

- Are you looking for unique, high-impact exhibit solutions?

All of our solutions are created to put the spotlight on your message.

The structures, textiles and printing techniques have been developed conjointly. The results: high quality and exceptional impact that helps showcase your image.

The endless combinations possible between panels and accessories ensure that your exhibit is unique.

- Are you an agile company looking for solutions tailored to your own pace?

A company exhibits 5 times a year* on average. This is why we design changeable, modular and reconfigurable exhibits with endless possibilities.

A range of optional accessories are also available to make them even more functional.

Our environmental approach guarantees you the most eco-friendly products

Throughout the entire life cycle of our products, we implement concrete actions with our network to minimize environmental impact.

Our eco-responsible approach takes the form of five commitments that are carried out throughout the entire life cycle of our products:

- 1 Opt to use recyclable, recycled, biodegradable or repairable raw materials and finished products whenever possible. Ensure that only the essential elements for desired features are used, i.e. no unnecessary parts.
- 2 Minimize the impact of manufacturing on the environment by using more eco-friendly machinery and optimizing the production process. Notably, our 1158 solar panels (2252 square meters) installed on the rooftop of our factory in France allow us produce 313 MW per year (for lower consumption: 30!).
- 3 Reduce environmental impact with local production and distribution centers. We produce and store in strategic, centralized locations (3 production facilities worldwide: Canada - France - Germany ; and logistics centers close to major cities)
- 4 Encourage the reuse of our solutions. All of our frames can be used for several events.
- 5 Oversee the recycling of raw materials and final products, or the transformation of non-recycled graphics into objects. For example, aluminum is systematically recycled, and we have created partnerships with local charitable associations to reuse graphics as textiles.

An environmental approach implemented throughout the entire life cycle of our products

Reuse of an exhibit graphic as a decorative wall frame

Production takes place locally, in Canada and across Europe, to limit the environmental impact of transport. Overall, we strive to integrate eco-friendly actions into our day-to-day activities and at every level.

Our turnkey offering

Services included for each exhibit.

EXHIBIT DESIGN

Your personalized solution, designed and quoted in 5 days and a viewer link that gives you a 360-degree visualization of your exhibit online.

FILE MANAGEMENT

An online portal for real time tracking of your order.

MADE LOCALLY

Manufactured and finished by our production facilities, located in Canada, France and Germany.

QUALITY CONTROL

100% of exhibits are inspected by our experts.

Our additional services

GRAPHIC CREATION

that boosts your image.

OPTIMIZED LOGISTICS SERVICES

to provide you with the best experience.

EXHIBIT INTER-NATIONALLY

thanks to an international network of assemblers available for set-up and dismantle.

EXHIBIT RENTALS

a smart economical solution for your occasional needs. A solution tailored to multimedia and LED video walls.

STORAGE SERVICES

for your exhibits.

Our tools to assist you

PS3D

Your 3D booth design software that allows you to make renderings and estimates for all our products in just a few clicks.

With the 3D Viewer extension, see your project online and share it with all collaborators thanks to a unique web link.

XPO.CENTER

Your personalized and secure file management portal, accessible 24/7. It allows you to access your current or past orders, as well as a summary view of your order status.

With xpo.center, upload your files, then generate and approve your e-proofs in just a few clicks.

Our expertise in dye-sublimation printing on fabric to enhance your communication

- Why choose fabric graphics?

Fabric graphics are very well-suited for use in the exhibit and events industries. They are easy to transport, handle and set up; they are scratch-resistant and wrinkle resistant.

They offer unrivaled aesthetic rendering with the best color execution that won't fade over time.

- What is dye-sublimation printing?

Sublimation is a physical phenomenon by which matter passes directly from a solid to a gas. The fabric's fibers are dyed directly, which improves color resistance over time.

- Benefits of this technology

- Unrivaled quality: dye-sub printing offers exceptional contrast, intensity and depth. Colors are vibrant and available in a wide range, including at high density.
- Anti-reflective: dye-sublimated fabric absorbs light and prevents glare from appearing on your image.
- More eco-friendly process: the inks used are aqueous solutions that are solvent-free and odorless.

Innovation

Create custom video walls using panoLED LED panels

The thinnest and most lightweight panel

Crisp images and vibrant colors

Preinstalled connectors for easy assembly

- panoLED lets you create modular video walls by quickly assembling 18.9"x18.9" (480 x 480 mm) panels.
- panoLED lets you innovate and bring your exhibits to life: reveal the beauty of your content with vibrant colors, spectacular images and a totally new visual experience.
- panoLED offers easy and ultra-secure attachment through the use of preinstalled h-line connectors.
- panoLED is designed to integrate with Panoramic h-line and c-line modular systems, and with conventional exhibits.
- A silicone edge graphic can be fitted to the reverse side of the panel thanks to a patented innovation (patent pending).
- panoLED allows for applications that go beyond exhibits: whether hanging, standing or integrated into a design, the applications are endless.

Innovation

panoramic[®] h-line

- Modular exhibits, from 10'x10'
- Packaged in a wheeled crate with frames and graphics preassembled
- May be set up with or without professional assistance

modular exhibits

The reference of modular exhibits

- Create a customized exhibit using pre-assembled modules that offer a wide range of functionalities
- The visual impact of h-line is created through large format, high-definition fabric graphics. The connections between the panels are invisible
- Panoramic h-line is compatible with panoLED: innovate and bring your exhibit to life with panoLED video walls
- Set-up time for an 10'x 20' exhibit is less than an hour

100% modular: 13 modules, 4 shows, 4 configurations, 4 locations

Reconfigure your h-line exhibit to suit your event, using the same pack of modules each time

100% modular: 13 modules for an unlimited number of configurations!

13 module pack

- 1 HMS038 standard module
- 1 HMS038-L2 standard lightbox module
- 2 HMS019 standard modules

LED spotlight 20W (includes transport bag)

The LED spotlight is brighter than a halogen spotlight and is much more energy-efficient!

Brochure-holders & display cases

mesh.4

Brochure holder with 4 fabric pockets (transport bag included)

mesh.8

Brochure holder with 8 fabric pockets (transport bag included)

holdup.classic

Brochure holder with 4 polycarbonate pockets (transport bag included)

helix.200

Large illuminated foldable display case with 4 shelves and 16 transparent panels

Dimensions
Ø22" x 78.7"
(Ø560 mm x H 2000 mm)

helix.106

Small foldable counter display case with 2 shelves and 8 transparent panels

Dimensions
Ø22.8" x 41.7"
(Ø580 mm x H 1060 mm)

Stand out from the crowd with a personalized, high-impact exhibit

Our exhibit solutions, especially those from the panoramic line, are designed to highlight printed images. Here are a few creative tips to maximize your visual effectiveness.

- Opt for an immersive design

Optical illusion effects, textures, high-resolution and large-format graphics, graphic personalization of the entire surface including the floor...these are just some of the ways you can immerse your visitor in your exhibit's environment.

- Focus on a simple graphic and a unique message

Trade show visitors have less than 30 seconds of attention to give you when they pass by your exhibit. The easiest message for them to understand is a simple message set against a sleek graphic background. Try to avoid using too many messages, colors or effects, as impact is created through simplicity.

- Combine continuous design with modularity

Your modular exhibit will evolve as you attend various trade shows and share different messages. The languages of your event may even vary. Don't hesitate to adapt its design as necessary. We guarantee perfect graphic continuity, even if your exhibit is sectioned into panels.

To create your graphics, please refer to the provided templates to create the appropriate files, and contact our project management team at the start of your project. You will then be guided through our xpo.center file management platform.

Four reasons to attend a trade show

- Meet decision-makers

According to Exhibit Surveys, in 2010, 80% of trade show visitors had “the power to recommend or make final purchase decisions”. In addition, 31% of visitors claimed that “their purchase intention was stronger after visiting the trade show”.

- Improve sales productivity

According to the French Statistical Audit Bureau for General and Specialised Fairs and Exhibitions (OJS), customer contact at a trade show is “four to ten times less expensive than a customer visit”. Contact cost for a exhibit averages at about \$20, whereas this contact ranges from \$80 to \$200 when made during field visits. Furthermore, a sales rep will meet with 15 customers daily at a trade show vs. an average of three customers during a field visit.

- Explore prospects

Trade shows hold a wealth of opportunities and present many “hot” receptive prospects because visitors attend shows on their own accord. This makes it an incredibly effective way for exhibitors to expand their customer base

- Communicate with the press and opinion leaders

Tips & tricks for making your trade show a success

Before the show

- Create a budget and set goals

Trade show participation is part of a company's overall strategy, as well as its marketing, sales and HR strategies. It is very important to set specific goals and create a budget that includes purchasing of space, an exhibit, as well as personnel costs (travel, hotels, restaurants). It is essential to create a system for gauging the success of each trade show.

- Select trade shows that your company wants to attend, then choose your placement and area size

A countless array of events exist, ranging from major international trade shows to local conventions. It is important that each trade show you attend corresponds to your company's challenges in terms of business. Many companies now prefer to attend local trade shows with small exhibit areas as they offer more returns on investment. Trade show organizers often offer pre-registration discounts, so it is best to reserve exhibit space in advance. Placement is also a very important factor. Opt for placement near the entrance, in the main aisles or near "locomotives" (leading companies that attract visitors).

- Seek assistance of trade show display and visual communication professionals

Exhibits and event planning are very specific fields and require experience. Seek the advice of professionals, and do not hesitate to ask your service provider questions on how to set up your exhibit and who will be involved. You may also request references and contact them.

- Create a brief for trade show display professionals

Clearly explain your objectives and your strategy. Several constraints may influence your trade show display specialist's recommendations, which can help you cut costs significantly.

What type of exhibit should you choose? We have divided exhibits into three categories based on their weight, volume and assembly time/difficulty. The categories are: portable tubular contour exhibits, modular panoramic h-line exhibits, custom panoramic c-line exhibits. Some contour and panoramic h-line exhibits may be set up and dismantled by exhibitors without any professional assistance.

How many times will you use your exhibit? If you will only use your exhibit once, opt for a rental. If you will reuse it several times, specify the various spaces where it will be used and your desired configurations. It is possible to start with a modular system that uses shared elements, which will allow you to create exhibits ranging in a wide variety of sizes.

Which features do you need? Reception counters, storage, product displays, videos, customer meetings, brochure distribution.... these are all features that influence how your exhibit is designed..

- Invite your customers and prospective customers

Trade show organizers provide free passes and distribute newsletters, which will allow you to easily inform your customers about your participation. Sales teams can also increase their scope of action by meeting with customers before and after the trade show for breakfast or dinner.

Remember that these times are just as effective as field visits.

During the trade show

- **Details make the difference**

Your exhibit is a reflection of your company's image. Make sure it is organized! A storage area is very useful for concealing packaging or for storing brochures. Modular solutions offer storage areas that are secured by a door, tubular solutions offer storage corners. Lighting is very important as it puts the spotlight on your message. Environmentally-friendly LED solutions help conserve electricity.

- **Brief your teams every morning**

Your team should be informed about your new products and services. A daily morning meeting before the show opens is a way to re-specify goals and answer questions that were asked the night before.

- **Create buzz around your exhibit**

To capture visitors' interest, create buzz around your exhibit with training sessions, wine & cheese samplings and other attention-drawing events.

After the trade show

- **Follow-up is the key to success**

A successful trade show is not just about meeting with customers and leads: Ensure that each lead has been addressed and a follow-up goal is established. Thank your customers after the trade show and follow up on each request individually. Ensure that each lead has been processed with an objective follow-up. You will then be able to gauge the show's success and decide whether or not you will attend it again in the future.

- **Reuse graphics after the trade show**

Exhibition systems like Panoramic allow you to use portions of your graphics, which can be cut or re-sewn. The single-sided frame can be mounted on a wall, and the double-sided frame lets you create fabric backwalls, which are like mini-exhibition kits.
